Summary

Artificial Intelligence and Data Science undergraduate with experience building AI systems, data-driven applications, and scalable backend services. Skilled in Python, SQL, and machine learning with hands-on experience developing computer vision pipelines, AI automation systems, and intelligent data processing solutions.

Education

P.E.S Modern College of Engineering, Pune Bachelor of Engineering in Artificial Intelligence and Data Science — CGPA: 9.0	2022 – 2026
M.E.S Abasaheb Garware College of Science and Arts, Pune HSC (Science) — 60%	2020 – 2022
B.V.B. Paranjape Vidya Mandir SSC — 89%	Till 2020

Projects

PPE Compliance Monitoring System - Built a real-time computer vision pipeline using YOLO and OpenCV to detect PPE compliance in industrial environments. - Processed detection outputs into structured datasets for monitoring and analytics. - Optimized inference pipeline achieving 41 FPS for efficient edge-device deployment.	Ongoing
Call Centre Compliance Monitoring System - Developed an AI-powered monitoring system to analyze customer service call recordings and detect compliance violations in call centre conversations. - Implemented speech-to-text transcription and NLP pipelines to extract conversation data and identify policy violations such as missing disclosures or improper communication. - Built automated analysis workflows to generate compliance reports and highlight flagged conversations for quality assurance teams.	Jan 2026
Secure Multi-Tenant RAG Document Assistant - Developed a secure Retrieval-Augmented Generation (RAG) system enabling organizations to query internal documents using natural language. - Implemented document embeddings, vector search, and indexing pipelines for efficient enterprise knowledge retrieval. - Designed multi-tenant architecture ensuring secure document access and scalable document Q&A workflows.	Nov 2025

Work Experience

Machine Learning Intern CodeAlpha Limited - Built machine learning models using Python, Scikit-learn, and TensorFlow for predictive analytics tasks. - Performed data preprocessing, feature engineering, and exploratory data analysis using Pandas and NumPy. - Generated insights through model evaluation and data visualization.	Sept 2025 – Oct 2025
Full Stack Development Intern CodeAlpha Limited - Developed web applications using React.js, HTML, CSS, and JavaScript. - Built RESTful APIs using Node.js to enable backend data integration and communication. - Used Git and GitHub for version control and collaborated on debugging and testing workflows.	Jan 2025

Technical Skills

Programming: Python, SQL, JavaScript, C/C++, Java
AI & Machine Learning: Scikit-learn, TensorFlow, Computer Vision, NLP, Generative AI
Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis
Web Development: Node.js, React.js, REST APIs, HTML5, CSS3
Databases: MySQL, MongoDB, PostgreSQL
Tools: Git, GitHub, Jupyter Notebook, VS Code, Postman, Power BI

Achievements

- Avishkar Competition — State Level Semi-Finalists, Top 10 out of 1500+ Teams (2025)
- 2nd Prize — College-Level Technical Competition
- Innovatexpo MESCOE Hackathon Finalist (2025)
