Portfolio

Summary

Artificial Intelligence and Data Science undergraduate with experience building [LOCATION REDACTED] systems, data-driven applications, and scalable backend services. Skilled in Python, SQL, and machine learning with hands-on experience developing computer vision pipelines, [LOCATION REDACTED] automation systems, and intelligent data processing solutions.

Education

P.E.S Modern College of Engineering, [NAME REDACTED] – 2026

Bachelor of Engineering in Artificial Intelligence and Data Science — CGPA: 9.0

M.E.S Abasaheb Garware College of Science and Arts, Pune 2020 – 2022

HSC (Science) — 60%

B.V.B. Paranjape Vidya Mandir Till 2020

SSC — 89%

Projects

PPE Compliance Monitoring System Ongoing

- Built a real-time computer vision pipeline using [NAME REDACTED] and OpenCV to detect PPE compliance in industrial environments.
- Processed detection outputs into structured datasets for monitoring and analytics.
- Optimized inference pipeline achieving 41 FPS for efficient edge-device deployment.

Call Centre Compliance Monitoring System Jan 2026

- Developed an [LOCATION REDACTED]-powered monitoring system to analyze customer service call recordings and detect compliance violations in call centre conversations.
- Implemented speech-to-text transcription and NLP pipelines to extract conversation data and identify policy violations such as missing disclosures or improper communication.
- Built automated analysis workflows to generate compliance reports and highlight flagged conversations for quality assurance teams.

Secure Multi-Tenant RAG Document Assistant Nov 2025

- Developed a secure Retrieval-Augmented Generation (RAG) system enabling organizations to query internal documents using natural language.
- Implemented document embeddings, vector search, and indexing pipelines for efficient enterprise knowledge retrieval.
- Designed multi-tenant architecture ensuring secure document access and scalable document Q&A workflows.

Work Experience

Machine Learning InternSept 2025 – Oct 2025

CodeAlpha Limited

- Built machine learning models using Python, Scikit-learn, and TensorFlow for predictive analytics tasks.
- Performed data preprocessing, feature engineering, and exploratory data analysis using [NAME REDACTED] and [LOCATION REDACTED].
- Generated insights through model evaluation and data visualization.

Full Stack Development InternJan 2025

CodeAlpha Limited

- Developed web applications using React.js, HTML, CSS, and JavaScript.
- Built RESTful APIs using [LOCATION REDACTED] to enable backend data integration and communication.
- Used [NAME REDACTED] and GitHub for version control and collaborated on debugging and testing workflows.

Technical Skills

Programming: Python, SQL, JavaScript, C/C++, [NAME REDACTED]: Scikit-learn, TensorFlow, Computer Vision, NLP, [NAME REDACTED] Analysis: [NAME REDACTED], [LOCATION REDACTED], Data Cleaning, Exploratory Data Analysis

Web Development: [LOCATION REDACTED], React.js, REST APIs, [NAME REDACTED], CSS3

Databases: MySQL, MongoDB, PostgreSQL

Tools: [NAME REDACTED], GitHub, [NAME REDACTED], VS Code, [NAME REDACTED], Power BI

Achievements

- Avishkar Competition — State Level Semi-Finalists, Top 10 out of 1500+ Teams (2025)
- 2nd Prize — College-Level Technical Competition
- Innovatexpo MESCOE Hackathon Finalist (2025)
